

459A.301 Settled open feedlot effluent basins — construction design standards — rules.

If the department requires that a settled open feedlot effluent basin be constructed according to construction design standards, regardless of whether the department requires the owner to be issued a construction permit under [section 459A.205](#), any construction design standards for the basin shall be established by rules as provided in [chapter 17A](#) that exclusively account for special design characteristics of open feedlot operations and related basins, including but not limited to the dilute composition of settled open feedlot effluent as collected and stored in the basins.
